TRA  
Snowsound® technology

I\_Due cavi paralleli sono il binario strutturale di una composizione di pannelli di un efficace impianto fonoassorbente, propedeutico a migliorare la qualità del suono negli ambienti. La possibilità di fissare liberamente i pannelli lungo cavi, consente di costruire coreografie molto scenografiche.

Marc Sadler

GB\_Two parallel cables make up the structural track in a composition of panels that creates an effective sound absorbing system, one element in improving the sound quality of the space. The ability to freely locate the panels along the cables makes it possible to construct dramatic backdrops.

Marc Sadler

F\_Deux câbles parallèles constituent les rails naturels de la structure d'une composition de panneaux comportant une installation d'isolation acoustique des plus efficaces destinée à améliorer la qualité du son dans les locaux. La possibilité de fixer librement les panneaux le long des câbles permet de créer des chorégraphies particulièrement intéressantes.

Marc Sadler

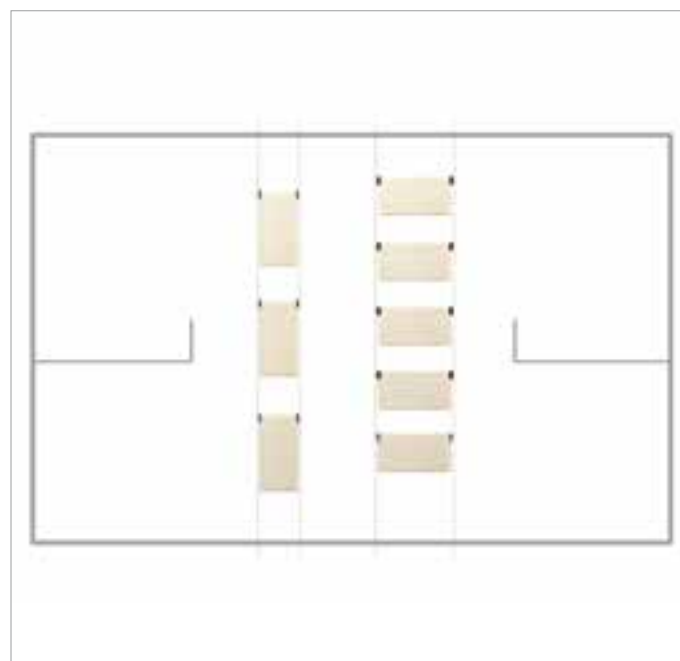

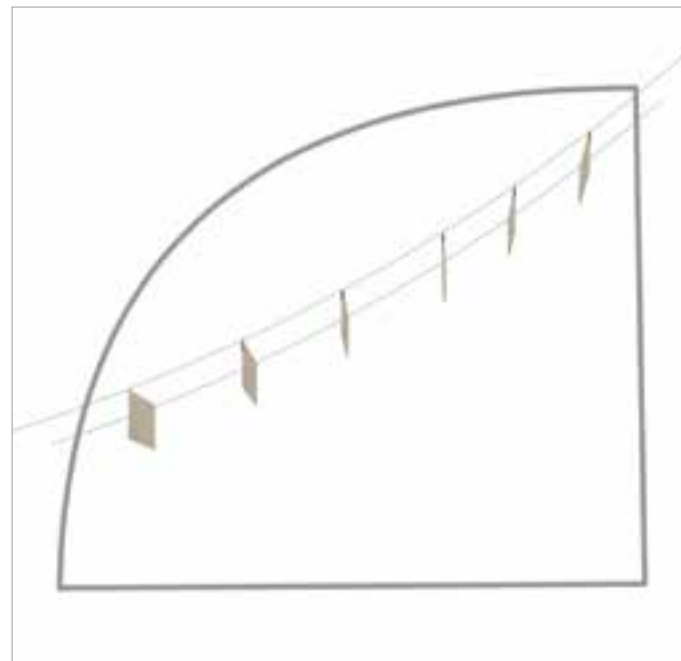

D\_Zwei parallele Kabel bilden die Gleitstruktur für eine Komposition von Paneelen mit effizientem Schalldämpfungssystem, das dazu dient, die Raumakustik zu verbessern. Durch die flexible Montage der Paneele auf Kabeln können atemberaubende Kompositionen erzeugt werden.

Marc Sadler

E\_Dos cables paralelos son el carril estructural de la configuración de paneles para una instalación eficaz fonoabsorbente, básica para mejorar la calidad del sonido en el local. La posibilidad de fijar libremente los paneles a lo largo de los cables ofrece la posibilidad de concebir coreografías muy escenográficas.

Marc Sadler

I\_TRA è un sistema brevettato composto da pannelli fonoassorbenti Snowsound® sospesi ad una coppia di cavi in acciaio inossidabile che si collegano tra due pareti mantenendo una naturale curvatura. I cavi di sostegno possono essere posizionati con diverse inclinazioni. I pannelli Snowsound® possono essere appesi ai cavi in varie posizioni, consentendo di ottenere composizioni sia esteticamente che acusticamente personalizzate.

GB\_TRA is a patented system consisting of Snowsound® sound-absorbing panels suspended to a pair of stainless steel cables which are connected between two walls while maintaining a natural curve. The supporting cables can be positioned at a number of angles. Snowsound® panels can be hung by cables in multiple positions, thereby creating compositions that can be personalised for aesthetics and sound.

F\_TRA est un système breveté composé de panneaux phono-absorbants Snowsound® suspendus à une paire de câbles en acier inoxydable qui se reliant entre deux parois en maintenant un cintrage naturel. Les câbles de suspension peuvent être positionnés selon différentes inclinaisons. Les panneaux Snowsound® peuvent être suspendus aux câbles dans différentes positions, ce qui permet d'obtenir des compositions personnalisées aussi bien esthétiquement qu'acoustiquement.

D\_TRA ist ein patentiertes System, das aus schallabsorbierende Snowsound®-Paneelen besteht, die mittels einem Paar Stahlseile, welches zwischen zwei Wänden gespannt wird, aufgehängt werden. Die Tragseile können in verschiedenen Winkeln angebracht werden. Die Snowsound®-Paneele können in vielen unterschiedlichen Positionen an den Stahlseilen aufgehängt werden, sodass man ästhetisch und akustisch gesehen personalisierte Lösungen erzielt.

E\_TRA es un sistema patentado compuesto por paneles fonoabsorbentes Snowsound® que cuelgan de dos cables de acero inoxidable que se han tendido entre dos paredes manteniendo una curvatura natural. Los cables de sostén se pueden colocar con diferentes inclinaciones. Los paneles Snowsound® se pueden colgar de los cables formando composiciones diferentes estéticamente y acústicamente personalizadas.
